Back-lit display enhances visibility of display in low lighting.
  - Play Mode
  - FM Station
  - Station Presets
  - DSP Mode and Settings
  - Table of Contents/Playlist: Table of contents displays all songs stored on flash memory card. Users can personalize a playlist by scrolling through the table of contents and tagging the songs they want to hear. The playlist will play back the selected songs in the order they were tagged.
  - Multi-line display lists name of artist, song and elapsed time when in playback mode. Can select up to 20 tracks to store in playlist memory.
  - Digital Volume Control
  - Low Battery Indicator
- **Forward/Reverse Track Skip**
- **Forward/Reverse Track Search**  
Allows audible high-speed scanning to desired part of selected track.
- **Hold**  
Activating Hold feature deactivates all other function buttons until Hold is switched off again to prevent accidental change of mode.
- **Auto Resume**  
Remembers track location and volume setting when power was shut off and resumes play at that track when power is returned.
- **Auto Power Down**  
Unit will automatically power down after 60 seconds of inactivity when pause or stop have been activated to help prolong battery life.
- **Removable Belt Clip**
- **Capability for Optional Future Software Upgrade to Support Multiple File Formats**

## Software Features

- **Includes MusicMatch<sup>3</sup> and RealJukebox<sup>1</sup> Music Management Software**
- **MusicMatch<sup>3</sup> Jukebox (PC and Mac)**  
Lets the user organize all tracks in a digital music library, create custom playlists through drag and drop or using the Auto DJ, play tracks on their PC and download files to a compact flash for portability.

- Encodes both MP3 and Windows Media<sup>2</sup> files.
- Auto DJ creates automatic Playlists based on the user's sorting preferences. Scans the entire Music Library for specific search results.
- Integrated CD Player.
- Art View allows the user to tag tracks with album art and view the cover art while the track is playing.
- Export to WAV
- MP3 Equalizer

- **RealJukebox<sup>1</sup> (PC Only)**  
Music management software to assist the user in organizing CD recordings and internet downloads<sup>5</sup>. The software automatically fills in album title, song title, artist and genre and provides sorting features to quickly find songs and create custom playlists.

- Encodes both MP3 and RealAudio G2<sup>1</sup> files.
- Album, track, artist and genre information is automatically retrieved from the internet.
- Export to WAV
- RealJukebox Get Music services for guided access to music on the internet.
- Higher encoding options
